## BioCare Wool & Down Wash

500 ml, Article No. 102687, EAN code 7350064221167

- 🌿 **Mild fine detergent for sensitive materials such as wool and down**
- 🌿 **Contains lanolin, the natural wool grease**
- 🌿 **Contains lemon eucalyptus oil for its antibacterial properties and fragrant scent**
- 🌿 **Readily biodegradable and highly biobased**
- 🌿 **Swedish innovation, made in Sweden**

Biobased delicate detergent for wool and down, as well as merino wool, mohair, silk, cashmere and similar delicate materials. Contains lanolin, the natural wool grease that recreates the natural beneficial qualities of wool and down. Also contains lemon eucalyptus oil, which has an antibacterial function and exudes a faint fresh scent. Down garments or down sleeping bags made from relatively shiny nylon/ripstop material are not damaged by the detergent, but retain their shine. Once the water no longer beads off your down jacket, you can re-impregnate it with OrganoTex Spray-On or Wash-In Waterproofing to improve its water repellent properties.

Wool and delicate materials should preferably be aired rather than washed, but when you do wash them, they should not be washed using detergents that contain enzymes. Enzymes can break down proteins in natural fibres like wool and down. If you take good care of your natural fibre garments, they will last longer.

### HOW TO USE:

- 1) Shake the bottle. Make sure the detergent compartment is completely clean.
- 2) Add 25 ml (for soft water) or 40 ml (for hard water) to the detergent compartment for approximately 2–4 kg. Do not use fabric softener.
- 3) Wash and dry the garment according to the product's washing instructions.

For hand washing: Add about 15 ml for 10 litres of water. Immerse and allow to soak for a while. Then rinse thoroughly. Gently squeeze out the water without twisting the garment. Also works in cold water.
