

OrganoTex®

ShoeCare Leather Wax

100 ml, Article No. 103106, EAN code 7350064221204

- 🌿 **Biobased neutral-colour leather wax**
- 🌿 **Creates water repellency and protects the leather**
- 🌿 **PFAS-free and free of palm oil and paraffin**
- 🌿 **Swedish innovation, made in Sweden**

Effective, multifunctional water-repellent wax that moisturizes, protects, and polishes leather. Maintains the material's breathability and extends its useful life. Remember that a matt leather like nubuck etc. will get more of a sheen if you wax it. Also suitable for shoes with membranes. The wax nourishes the leather, but does not leave boot shafts or riding boots too soft.

Suitable for all types of leather (not just shoes), such as leather bags, furniture, belts, etc.

The product is 100% biobased and free of palm oil and paraffin. OrganoTex's innovative products are inspired by nature's own chemistry. They are developed and manufactured in Sweden by greentech company OrganoClick.

When is it time to wax your shoes and boots?

Once the water seeps into the leather or fabric, it's time to impregnate them. By cleaning and reproofing them regularly, you extend the useful life of your shoes.

HOW TO USE:

- 1) Clean the leather with a damp cloth or brush.
- 2) Distribute the wax evenly with your fingers or a cloth.
- 3) Wait a few minutes and then polish lightly with a cloth.

CONTENTS

Water, organic silicon polymers, beeswax, and natural fatty acids.

VOLUME:	100 ml/80 grams
SHELF LIFE	24 months, opened packaging
RECYCLING	Metal
MANUFACTURER	OrganoClick AB, www.organoclick.com
