

OrganoTex®

Wash-In Textile Waterproofing

500 ml, Article No. 102389, EAN code 7350064221105

- 🌿 **Restores water and dirt repellent properties**
- 🌿 **Maintains the material's breathability**
- 🌿 **PFAS-free and readily biodegradable**
- 🌿 **Swedish innovation, made in Sweden**

Textile waterproofing that is easily washed into the garment in a washing machine. Improves the water and dirt repellent properties of the fabric. Extends the life of the garment by protecting the fibres and restoring their ability to repel water. Maintains the material's breathability, colour and structure, as the impregnation does not form a film on the surface but binds deep down in the textile.

Suitable for synthetic materials such as polyester and polyamide in waterproof rain and shell garments, as well as all types of outdoor gear, down jackets, windbreakers, ski clothing, etc. Can also be used on sleeping bags, covers, horse blankets, cushions, and other outdoor textiles.

The product is PFAS-free and readily biodegradable (according to OECD301A), so nothing remains left in nature. The patented technology is inspired by nature's own chemistry, as in the highly water-repellent properties of the lotus leaf. OrganoTex is developed and manufactured in Sweden by greentech company OrganoClick.

When is it time to reproof?

Once the water no longer beads off the outer fabric of your raincoat, shell jacket or other functional outdoor gear, the factory-applied treatment, termed DWR*, has been washed out.

A wet outer fabric reduces garment breathability by about 70%. This means that despite a good membrane that is designed to keep you dry and "breathes" at the same time, the garment feels cold and heavier and you get wet on the inside.

By washing and reproofing your garments and equipment regularly, you maintain their function and extend their useful life.

*The factory-applied treatment of an outer fabric is often called DWR, which stands for Durable Water Repellent.

OrganoTex®

HOW TO USE:

- 1) Wash the textile/garment (we recommend OrganoTex BioCare as a detergent), rinse thoroughly without fabric softener. Leave the garment in the machine.
- 2) Shake the bottle. Pour 100 ml into the detergent compartment for 1 garment. Add an additional 50 ml for each extra garment. Do not exceed 3 garments per wash.
- 3) Run a short wash program at 30–40 degrees with spin (follow the garment's washing instructions).
- 4) Drip dry for at least 24 hours until the outer fabric is completely dry, or dry in a tumble dryer or drying cabinet if the garment's washing instructions allow it.

CONTENTS

Water, organic silicon polymers, natural fatty acids, non-ionic surfactants and zirconium acetate.

VOLUME	500 ml.
COVERAGE	Serves for 5–7 garments
SHELF LIFE	24 months, opened packaging
RECYCLING	Sorted as plastic (rPET bottle)
STORAGE	Frost-free, out of reach of children
MANUFACTURER	OrganoClick AB, organoclick.com
CONTACT	organotex@organoclick.com

UFI: 1GN3-M9Q4-D00X-EVNP

MADE GREEN INSIDE by OrganoClick

Manufactured and developed in Sweden by OrganoClick AB, according to ISO 14001 and ISO 9001.

OrganoTex® is developed and manufactured in Sweden by greentech company OrganoClick AB. With innovative chemistry and biodegradable fossil-free raw materials, OrganoClick mimics nature's own solutions and creates sustainable materials and products of the future with cutting-edge technical performance and functionality. OrganoClick has won numerous awards for its green innovations.
