- 🌿 **Odor remover for elimination of all bad smells from shoes, sportswear, and equipment**
- 🌿 **Biobased, readily biodegradable, and biocide-free**
- 🌿 **Maintains breathability of waterproof membranes**
- 🌿 **Eco-labelled with USDA Certified Biobased Product 100%**

300 ml: Article No. 104121

ShoeCare Odor Remover neutralizes and eliminates bad smell in all shoes, boots, sports gear and equipment. It contains biobased deodorizing ingredients that efficiently capture and bind malodorous molecules, making your gear smell like new again. The fresh formula is mild to the skin and comes with a natural scent of mint.

Applications

Suitable for all types of footwear, including trainers, sneakers, boots, and running or football shoes. Ideal for removing unpleasant odors from sportswear and equipment such as jackets, backpacks, helmets, skates, skiwear, pads, and body protectors. The formula is optimized to maintain breathability and is therefore recommended for items with membrane technology like Gore-Tex®. It is specifically designed not to affect the DWR*-treatment on the outer fabric when applied to the inside of functional materials. Its gentle nature makes it safe to use on delicate or sensitive materials.

*Durable Water Repellent

Sustainability

This eco-labelled product is 100% biobased and consists only of ingredients that are readily biodegradable according to OECD 301 testing methods. It is free from biocides and ethanol. Instead, it uses a technology building upon a combination of plant-based odor trapping actives. The product comes in a bottle made of 100% recycled plastic (rPET).

Contents

Water, plant-based odor adsorbing ingredients, and mint essential oil.

How to use

- 1) Cleaning with a mild cleaning agent is recommended if the shoes or items are very dirty. Use for example OrganoTex ShoeCare Cleaner. Remove loose insoles if present.
- 2) Apply by spraying on the inside of the shoes, insoles, or equipment. Make sure to avoid the outer material as residue may reduce the water repellency.

OrganoTex®

3) Leave to dry according to care instructions, then put back insoles.

Tip: To improve water repellency, spray or wax with OrganoTex Waterproofing or Leather Wax.

Other information

Shelf life: 12 months, opened packaging. Storage: Frost-free, out of reach of children. Recycling: Sorted as plastic (PET).

Made Green Inside by OrganoClick®. OrganoTex® is developed and manufactured in Sweden by OrganoClick AB, in accordance with ISO 14001 and ISO 9001. OrganoClick is a Swedish greentech company that mimics nature's solutions with green chemistry, using biodegradable and fossil-free raw materials to create products and materials for the future. For its green innovations, OrganoClick has received several awards.
